

HOSPITAL-ACQUIRED INFECTION ORIGIN: *Was it a Septic Transfusion Reaction?*

*RECOGNIZE

SEE ONE? CHECK FOR OTHERS!

ACT

If you suspect a transfusion reaction:

1. **STOP** the transfusion
2. **REPORT** to your blood bank
3. **CULTURE** the patient, bag, and sibling unit(s)**
4. **INITIATE** sepsis workup protocol

~1:1500 platelet units may be bacterially contaminated.¹

**One donor can give up to 3 platelet units.
Protect other patients from the sibling units.
